

COVID-19 UPDATE

The latest updates from Cigna

As National Nurses Week continues, we recognize and [thank you](#) – and the nurses who work alongside you – for dedicating your lives to delivering timely, compassionate care to patients everywhere. As you work together to treat patients during this challenging time, we are committed to keep you updated on our latest COVID-19 developments.

Updates to our COVID-19 provider web page

On May 8, 2020, we updated our [COVID-19 provider web page](#) to include information on key topics, including laboratory billing, resuming elective surgeries, and virtual care for home health services.

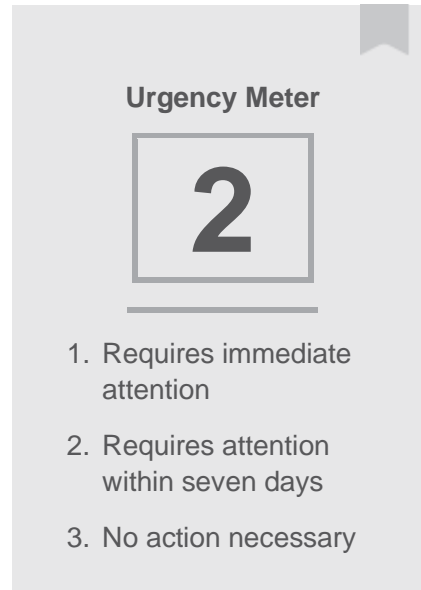

New resources are also available for you and your patients:

- [Parachute Rx](#) – Express Scripts has a new program to help individuals who are unemployed or uninsured as a result of the COVID-19 pandemic. Parachute Rx is a temporary program that provides deep discounts on many of the most commonly prescribed drugs.
- [Diagnostic Testing Site Locator](#) – The COVID-19 Diagnostic Testing Site Locator is a tool for customers and providers to search for local sites that can test individuals for the presence of COVID-19. Use this tool to supplement a list of testing sites you may already have.

Thank you again for the quality care you provide and for all that you're doing to help our customers.

If you have additional questions about how Cigna is responding to COVID-19, please contact me directly anytime.

Thanks again,
Janice Patrick

The graphic is a grey rectangular box with a white border. At the top, it says "Urgency Meter" in a bold, black font. Below this, there is a large, bold, black number "2" inside a square frame. Underneath the frame, there is a horizontal line. Below the line, there is a list of three items:

1. Requires immediate attention
2. Requires attention within seven days
3. No action necessary
